The figure displays a 10x10 grid of microscopy images showing individual yeast cells. Each cell is stained with a nuclear marker, appearing as a bright blue nucleus against a darker cytoplasmic background. The cells are roughly circular or oval in shape. Below each image is a unique identifier:

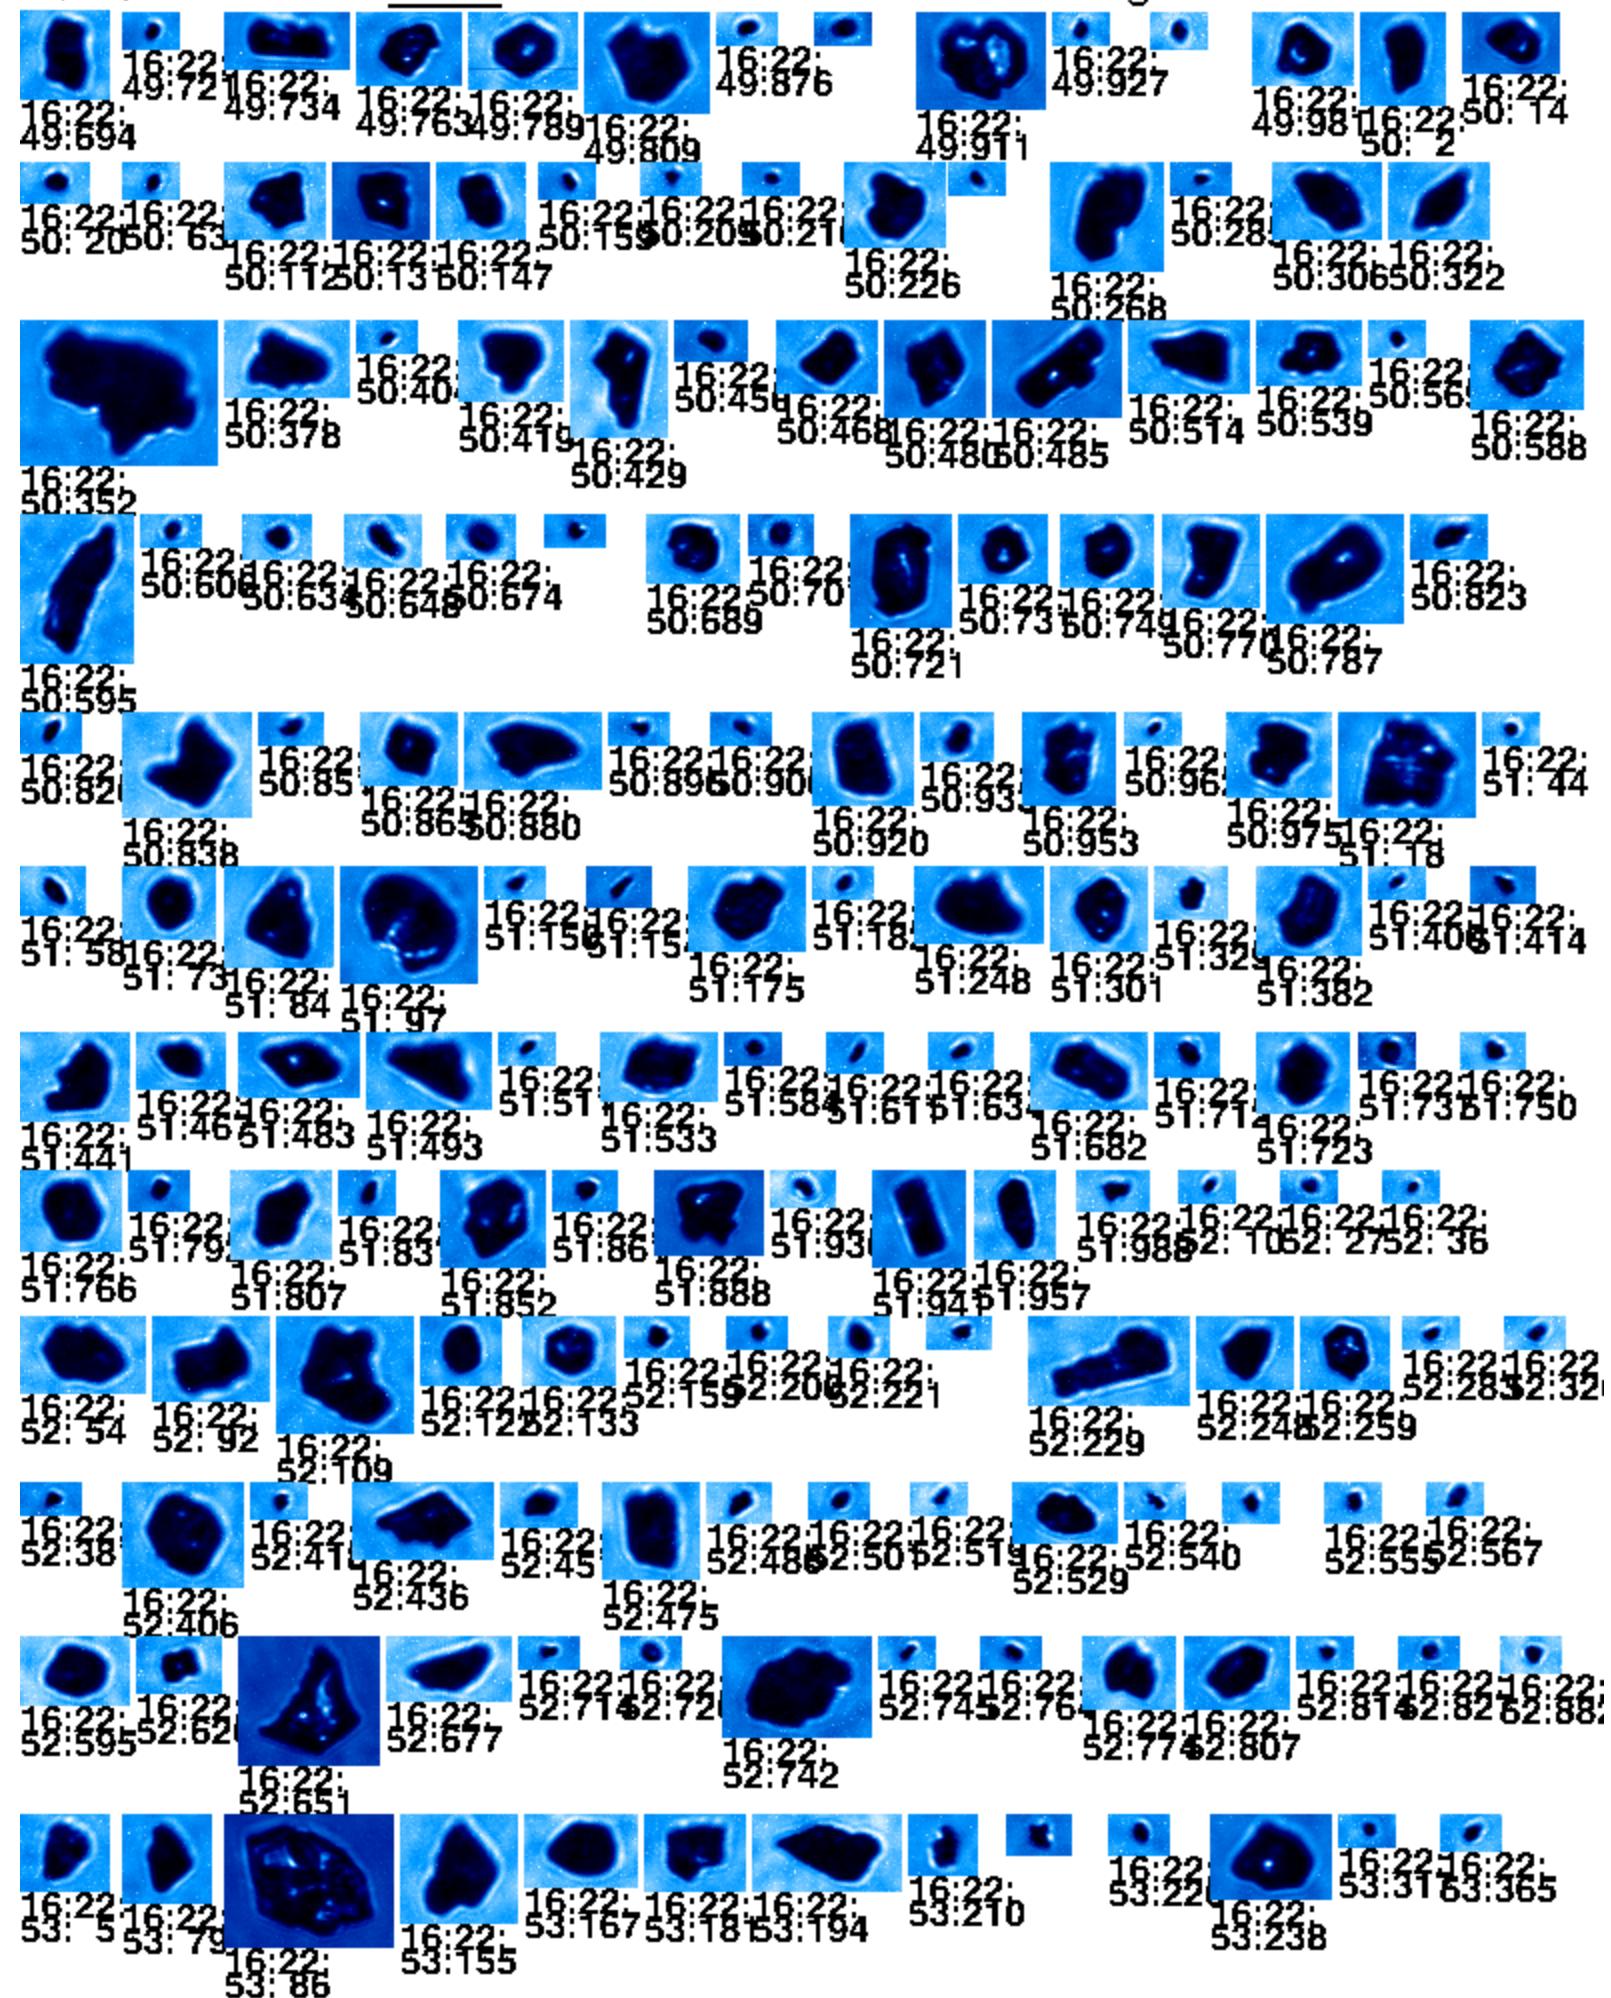

- Row 1: 16:22:16:22, 16:22:16:22, 16:22:16:22, 16:22:16:22, 16:22:16:22, 16:22:16:22, 16:22:16:22, 16:22:16:22, 16:22:16:22

The image displays a 10x10 grid of fluorescence microscopy images of yeast cells. Each image shows a single cell with a nucleus stained blue and cytoplasmic components in various shades of red and green. To the left of each image is its corresponding label, which consists of two 16-bit binary strings separated by a colon. These labels are rotated 90 degrees counter-clockwise relative to the image itself. The labels are arranged in a grid pattern, matching the position of the corresponding images.

The image displays a 10x10 grid of fluorescence microscopy photographs of yeast cells. Each cell is outlined in white, and its nucleus is stained blue. Below each cell is a unique identifier consisting of two four-digit numbers separated by a colon, such as 16:24 or 23:955. The identifiers are arranged in a grid pattern corresponding to the cells.
